TECHNICAL SKILLS

- Programming: Python
- Data Analysis: Pandas, NumPy
- Data Visualization: Matplotlib, Seaborn
- Technologies: Machine Learning, Deep Learning
- Database: MySQL
- Cloud: AWS (S3, IAM)
- Tools: Power BI, VS Code, Jupyter Notebook

PROJECTS

Student Performance Analysis & Prediction:
Python, Pandas, NumPy, Matplotlib, Seaborn, scikit-learn
Developed a Student Performance Prediction project using Python and Machine Learning to analyze factors affecting academic performance. Performed data preprocessing, visualization, and feature analysis on student data. Built Linear Regression, Logistic Regression, and Random Forest models to predict scores and classify student grades accurately.

Exploratory Data Analysis - Laptop Sales Dataset:
Tools: Python, Pandas, NumPy, Matplotlib, Seaborn
Analyzed structured datasets to identify patterns and trends. Handled missing values and outliers using statistical techniques and created meaningful visualizations.

Employee Salary Prediction Using ANN:
Python, Pandas, NumPy, scikit-learn, TensorFlow/Keras
Analyzed employee demographic and job-related data. Applied one-hot encoding and feature scaling, built an ANN regression model, and evaluated performance using MAE and loss curves.

AWS Data Storage & Access Management:
Tools: AWS S3, IAM, KMS
Managed secure data storage using S3 buckets and implemented role-based access control with IAM policies and KMS encryption.
